

GALLERIA ALESSANDRA BONOMO

ELGER ESSER

NOVEMBER 22nd
6 p.m.

Elger Esser shows photographs from his travels in France, Giverny and Normandy, and in the Middle East, Lebanon, Israel and Egypt.

In this exhibition and in his latest works we are able to rediscover a variety of subjects and techniques explored by the artist through the years.

The small-scale works realized on silver-plated copper plates, his most classic pictures of the routes in France, long exposures and dilated times of pure contemplation of the landscape, introduce us to a direct vision of the subject and of all its details, which can escape in the real life.

In his perspectives, nature and architectural elements give us ideal horizons and the suggested timeless dimension is actually the "eigenzeit". Thus, in the infinite landscapes of the artist, photography solves his pictorial moment.

Elger Esser, German artist, Roman by adoption (he lived in Rome from 2 to 19 years), has maintained in photography the characteristics of the Becher's german school and italian sensibility.
